Daniel Vetencourt – Backend Developer

Spain, Barcelona· https://www.linkedin.com/in/daniel-vetencourt· +34 672 89 18 93· dvetencourt23@gmail.com

Back-end engineer *with 2+ years of experience focused on* ***NodeJS/Python, CI/CD****, and* ***cloud infrastructure****, with experience building scalable web platforms,* ***AWS deployments****, and automation tooling; currently working on* ***AI agent infrastructure*** *and dev tools at Toloka AI. Looking to deepen my work in backend architecture and system design, take on more technical leadership, and bring AI capabilities — agents, RAG, LLM integrations — into production backend systems as a first-class part of the product rather than a bolt-on.*

PROFESSIONAL EXPERIENCE

Python Engineer | AI Agent Infrastructure & DevTools *Spain, Barcelona*
Toloka AI *December 2025 – Present*

- Built Python tooling and CLI validators that catch malformed task data before it reaches production, including server-side changes to the in-container Python services that deliver context to AI agents.
- Redesigned CI execution logic so each commit triggers only the workflows it affects, cutting redundant pipeline runs and compute cost; consolidated duplicated workflow logic into reusable GitHub Actions.
- Developed internal developer tools and analyzed pipeline cost and runtime to find bottlenecks, reducing onboarding time and guiding where to invest in infrastructure work.

Full Stack Developer *Venezuela, Maturin*
Agroindustrial Mandioca C.A. *October 2024 – January 2026*

Sole developer of the company's internal operations platform — from requirements gathering to production; 20–30 daily users across multiple departments.

- Ran the full requirements study: interviewed managers and operators, mapped day-to-day processes, and scoped the first release around raw-material intake.
- Designed the data model and REST API (Express, later migrated to NestJS) with JWT auth and dynamic role-based permissions, covering intake, production, storage, dispatch and inventory.
- Integrated industrial scales over serial communication for automatic truck weighing, plus QR-based traceability and a Telegram bot for notifications, removing manual entry errors and cutting support response times by 75%.
- Deployed and operated the platform on AWS (EC2, RDS, S3, Route53, VPC) with a Next.js frontend consuming the API — still in production and in daily use.

Academos Venezuela, Maturin
Programming Instructor | Robotics, Electronics, Backend *October 2024 – October 2025*

- Taught Python, programming logic, and databases through hands-on exercises and project-based challenges that moved students from fundamentals toward independent development.

EDUCATION

Harbour.Space Institute of Technology **Spain, Barcelona**
MSc in Data Science *Jan 2026 - Present*
Coursework: machine learning, statistics, probability, data engineering.

Universidad de Oriente, Núcleo de Monagas **Venezuela, Maturin**
BEng in Systems Engineering *2019 – 2026*
GPA 8.66/10 *(Degree pending)*

Universidad Politécnica Territorial del Norte de Monagas "Ludovico Silva" **Venezuela, Maturin**
BEng in Informatics Engineering *May 2023*
Magna Cum Laude · GPA 19.663/20 — **highest GPA in Venezuelan higher education, 2023.**

TECHNICAL SKILLS

- **Languages:** Python, JavaScript/TypeScript, SQL, Bash
- **Backend:** NestJS, Express, FastAPI, REST APIs, JWT, Prisma, TypeORM, Alembic
- **Infrastructure & DevOps:** AWS, Docker, Linux, GitHub Actions, CI/CD
- **AI Tooling:** LLM coding agents (Claude Code), MCP servers, OpenRouter
- **Databases:** MySQL, PostgreSQL, SQLite — schema design, query optimization
- **Frontend:** Next.js, React, HTML/CSS, TailwindCSS
- **Testing/Tooling:** pytest, JSON Schema, YAML, UML modeling

SOFT SKILLS

- **Spoken languages:** Spanish (native), English (C1)
- **Additional:** technical leadership of 4–10-person project teams · technical writing and documentation · remote collaboration across distributed teams

AWARDS & HONORS

- **Outstanding Young Student Award — Highest GPA in University Education, Venezuela (2023),** national recognition.
- **Honor of Merit for Outstanding Semester,** Universidad de Oriente — I-2022 (9.21/10) and II-2022 (9.47/10).

CERTIFICATIONS

- **CS50x: Introduction to Computer Science —** Harvard University (2025)
- **CS50p: Introduction to Programming with Python —** Harvard University (2024)
- **Scrum Fundamentals Certified (SFC) —** ScrumStudy (2024)
- **Introduction to Back-End Development / Programming in Python / GIT —** Meta (2024)
- **Network Design and Implementation (MikroTik) —** Academos & CIEM Venezuela (2024)
